Do your research when looking into metal roofing

Dear Glenn: My husband and I recently discovered that we need to replace our roof. A friend suggested metal roofing. Do you think it is worth the extra cost, and if so, are there any particular manufacturers and installers you recommend? Also, do you think steel or aluminum is better?

Kathy, Flint

Dear Kathy: Planning prevents poor projects. You have a company right in your area that has seminars on metal roofs. American Metal Roofs, (810) 762-0126, www.americanmetalroofs.com, seminars run all the way thru December. Check out their Web site for days and times. Remember, learn all you can before you do.
